

REUSABLE FACE MASK

KEY FEATURES

- 180gsm knitted polyester outer and 160gsm minimat mesh for minimal breathing resistance.
- Internal pouch to allow for easy replacement of filter.
- Multi-layered construction with replaceable Respitex filter.
- Curved centre seam and anatomical cut for a contoured fit.
- Durable elastic straps for comfortable fit.

CARE INSTRUCTION FOR YOUR MASK

Please ensure you follow the care instructions below to ensure effective performance of the face mask:

- Remove filter and soak the mask for 20 minutes daily after use using warm, soapy water and giving a thorough scrubbing.
- Rinse thoroughly after soaking and ensure that there is minimum to no odour after washing and before reuse.
- Test for sensitivity to skin based on cleaning solution used.

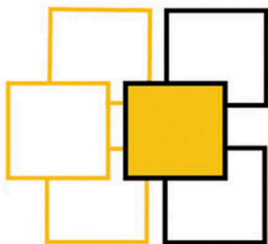

REPLACEMENT

- Replace mask after 10 washes.
- Colour will fade after washing.
- Replace immediately should any visible damage to the construction of the mask occur or should breathing become difficult.
- Filter element is for single use only and no longer than 8 hours, after which it should be replaced. Filter should be removed prior to washing and replaced with a new filter element once the mask is clean and dry.

Proudly manufactured in South Africa
